Mathematical Methods in the Applied Sciences

CONTENTS

VOLUME 14, Nos 1–9

Issue No. 1, January 1991

Non-linear Flexings in a Periodically Forced Floating Beam: A. C. Lazer and P. J. McKenna 1

The Three-dimensional Wigner–Poisson Problem: Existence, Uniqueness and Approximation: F. Brezzi and P. A. Markowich 35

Dynamical Shape Control and the Stabilization of Non-linear Thin Rods: J. Sokolowski and J. Sprekels 63

Issue No. 2, February 1991

Boundary Value Problems to a Certain Class of Non-linear Diffusion Equations: T. Nagasawa 79

The Global Existence of Solutions to the Equations of Motion of a Viscous Gas with an Artificial Viscosity: J. Neustupa 93

A Half-space Problem for a Non-linear Boltzmann Equation Arising in Semiconductor Statistics: F. Poupaud 121

Global Existence of Weak Solutions for a System of Non-linear Boltzmann Equations in Semiconductor Physics: F. J. Mustieles 139

Issue No. 3, March 1991

An Artificial Boundary Condition for an Advection–Diffusion Equation: J.-P. Lohéac 155

On the Mildly Degenerate Kirchhoff String: A. Arosio and S. Garavaldi 177

Indexed or abstracted by Applied Mechanics Reviews, Boundary Elements Abstracts, Cambridge Scientific Abstracts, Compumath Citation Index, Current Contents, Engineering Index, Engineering Societies Library, INSPEC, Mathematical Reviews, SCISEARCH database, VINITI–USSR Academy of Science and Zentralblatt für Mathematik.

The Blow-up Rate for the Heat Equation with a Non-linear Boundary Condition: M. Fila 197
Entropy Compactification in Lagrangean Gas Dynamics: I. Vecchi 207

Issue No. 4, May 1991

An Approximation of the Thermal Field in a Continuous Casting Process of a Thin Metal Layer: E. Comparini and C. Manni 217
Resonances in Periodic Media: P. Werner 227
Optimal Control of Thermomechanical Phase Transitions in Shape Memory Alloys: Necessary Conditions of Optimality: M. Brokate and J. Sprekels ... 265
Differential Stability of Solutions to Parametric Optimization Problems: M. Rao and J. Sokołowski 281

Issue No. 5, July 1991

A Uniqueness Theorem in the Dynamical Theory of Piezoelectricity: A. Morro and B. Straughan 295
Charge Transport in Semiconductors with Degeneracy Effects: F. Poupaud and C. Schmeiser 301
The Problem of Equivalence in Statistical Mechanics in Equilibrium: J. Schröter and R. Wegener 319
Asymptotic Completeness in Optical Scattering: F. Jochmann 333
On the Theory of Cylindrical Resonators: Y. V. Shestopalov 355

Issue No. 6, August 1991

On a Class of Ill-posed Non-linear Integral Equations Arising in the Interpretation of Indirect Measurements: B. Hofmann 377
Diffraction by an Acoustically Transmissive or an Electromagnetically Dielectric Half-plane: A. D. Rawlins 387
On the Linear Piezoelectricity of Composite Materials: N. Turbé and G. A. Maugin 403
Blow-up for Semilinear Parabolic Equations with a Gradient Term: P. Quittner 413
Global Smooth Solution for Coupled Non-linear Wave Equations: G. Boling and T. Shaobin 419
Time Decay of Solutions of Semilinear Strongly Damped Generalized Wave Equations: P. Biler 427
Addendum
An Integral Operator Related to the Stokes System in Exterior Domains: P. Deuring 445

Issue No. 7, September 1991

Physical Model, Theoretical Aspects and Applications of the Flight of a Ball in the Atmosphere. Part I: Modelling of Forces and Torque, and Theoretical Prospects: P. M. Fuchs 447

Physical Model, Theoretical Aspects and Applications of the Flight of a Ball in the Atmosphere. Part II: Theoretical Aspects in the Case of Vertical Angular Frequency and Applications: P. M. Fuchs 461

Local Existence for Solutions of Fully Non-linear Wave Equations: P. Lesky Jr 483

Generalized Limiting Absorption Method and Multidimensional Inverse Scattering Theory: R. Weder 509

Issue No. 8, October 1991

Wiener-Hopf Equations for Waves Scattered by a System of Parallel Sommerfeld Half-planes: E. Meister, K. Rottbrand and F.-O. Speck 525

A Trace Theorem for Solutions of Linear Partial Differential Equations: G. Bao and W. W. Symes 553

On Mathematical Modelling of Absorption and Dispersion of Seismic Waves for Low Frequencies: L. von Wolfersdorf and L. Rost 563

Convergence Analysis for a Multiplicatively Relaxed EM Algorithm: A. N. Iusem 573

Issue No. 9, November 1991

The Two-dimensional Wigner-Poisson Problem for an Electron Gas in the Charge Neutral Case: A. Arnold and F. Nier 595

Solutions of the Equation $\partial_t^n f(x,t) = \hat{L}\ (x,t)\ f(x,t) + S(x,t)$. Exact Solutions of Some Partial Differential Equations in Mechanics and Physics: H. I. Abdel-Gawad 615

Green's Contact Functions for Heat Conduction of Two Half-spaces and Half-planes with Application to Several Boundary Contact Problems: L. Jentsch . 633

Author Index 663
